

Transforming Transportation for Electric Vehicles

Planning for electric vehicles in the Tahoe-Truckee Region
Advisory Planning Commission - July 12, 2017

Outline

- Why Plan for electric vehicles?
- Current Conditions Results
- Readiness Plan & Addressing Challenges
- Toolkits, Action Plan, Performance Metrics & Next Steps

- Convened Coordinating Council four times from 2016 to 2017.

EV Technology

Plug-in Hybrid Electric Vehicle (PHEV)
 Includes an internal combustion engine, electric motor, and rechargeable battery. Fueled by gas & electricity. Less recharge time than BEVs.

PHEV Example, Chevy Volt

Battery Electric Vehicle (BEV)
 Includes electric engine and rechargeable battery. Fueled 100% by electricity. Zero tailpipe emissions, greater electric range, & no fuel costs.

BEV Example, Tesla

Overview of Chargers

Level 1 AC Charger, home charging

Level 2 AC Charger, home and business charging

CHAdeMO Direct Current (DC) Fast Chargers

Type	Current	Voltage	Average Charging Time to Full	
			PHEV	BEV
Level 1	AC	120 V, 15-20 A	3-7 h	14+ h
Level 2	AC	240 V, > 80 A	1-3 h	5-7 h
DC Fast Charger	DC	480 V, >120 A	< 30 m	< 1 h

GHG Emissions Reduction

Renewable Energy Targets

- NV: 25% renewable by 2025
- CA: 50% renewable by 2030

GHG Sources in Tahoe: 23% Transportation

All-electric = zero tailpipe emissions plus emissions from electricity

- Difference between all electric & Gas Vehicles: **70% reduction**
- Reduction difference between Plug-in Hybrid Electric & Gas Vehicles: **30% reduction**

Electricity Sources NV

Source	Percentage
Natural Gas	63.26%
Coal	18.04%
Geothermal	7.52%
Hydro	6.58%
Solar	2.79%
Biomass	0.89%
Wind	0.83%
Oil	0.04%

Electricity Sources CA

Source	Percentage
Natural Gas	59.09%
Nuclear	9.42%
Solar	7.64%
Hydro	7.11%
Geothermal	6.28%
Wind	6.23%
Biomass	3.52%
Other	0.46%

Why Plan for EV Readiness?

- Areas w/ EV planning had **90%** greater utilization compared to ad hoc uncoordinated planning
- ↓ Range anxiety
- Regional momentum

All-inclusive charge point in Gilroy, CA; photos of wayfinding

ICCT White Paper: Assessment of leading electric vehicle promotion activities in United States cities and 2) Idaho National Labs Paper: How Does Utilization of Non-Residential EVSE Compare Between those Installed in Oregon in Planned versus Unplanned Locations?

Who is Involved?

- CA Energy Commission Grant
- Team: TRPA, Truckee-Donner PUD, and consultants (ICF)
- Tahoe-Truckee Council
- Stakeholders, Public

Purpose of Plan

Transportation Vision: Encourage travel by bus, bike, foot, or PEVs over conventional vehicles

Lays out the path to make the Tahoe-Truckee Region “PEV ready”

- Snapshot of current conditions
- Identify barriers to increase EV use & improve access to chargers

Develop partnerships & identify actions to unlock the long-term potential of transportation electrification as a sustainability initiative

Readiness Plan

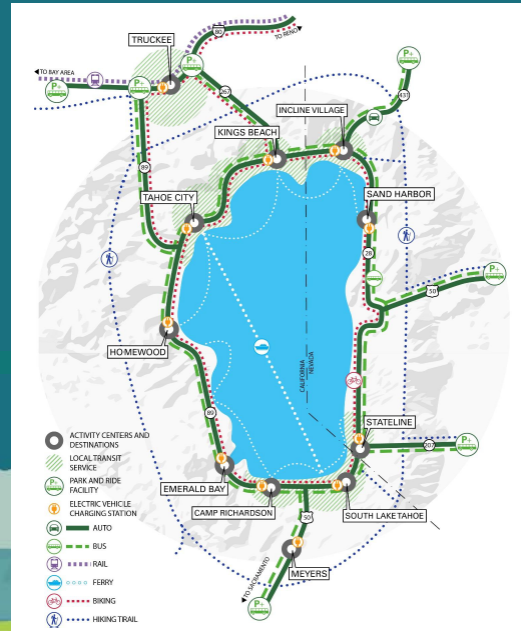

- Forecasted growth
- Policies, incentives, and funding
- Barriers
- Charging infrastructure siting analysis
- Goals and actions
- Performance measurement

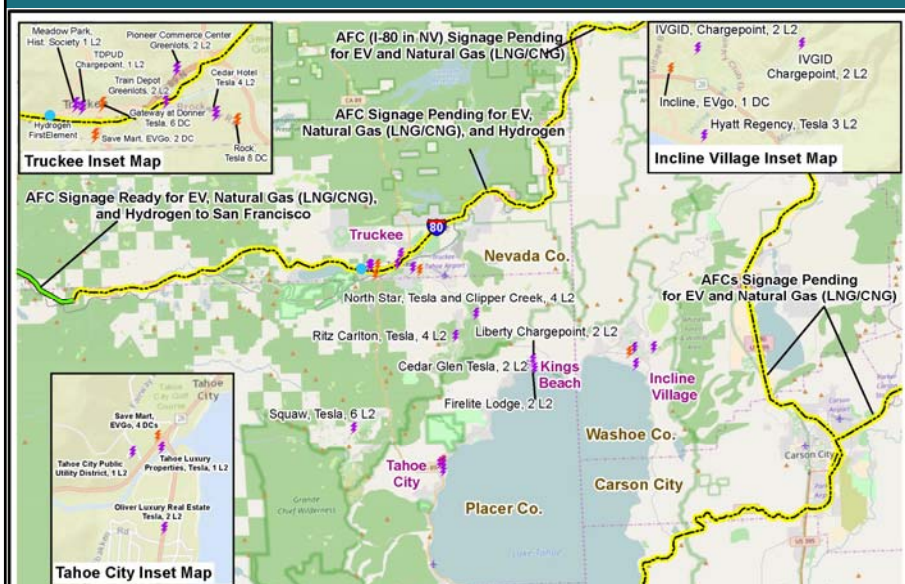

Electrification Goals & Vision

1. Maximize the share of electric miles over conventional vehicles
2. Make it easier & less expensive to install chargers & make them broadly accessible
3. Improve electric vehicle awareness

Regional Chargers

32 charging locations | 80 charging plugs | 17 DC fast chargers (16 in Truckee, 1 in SLT)

MAP KEY:

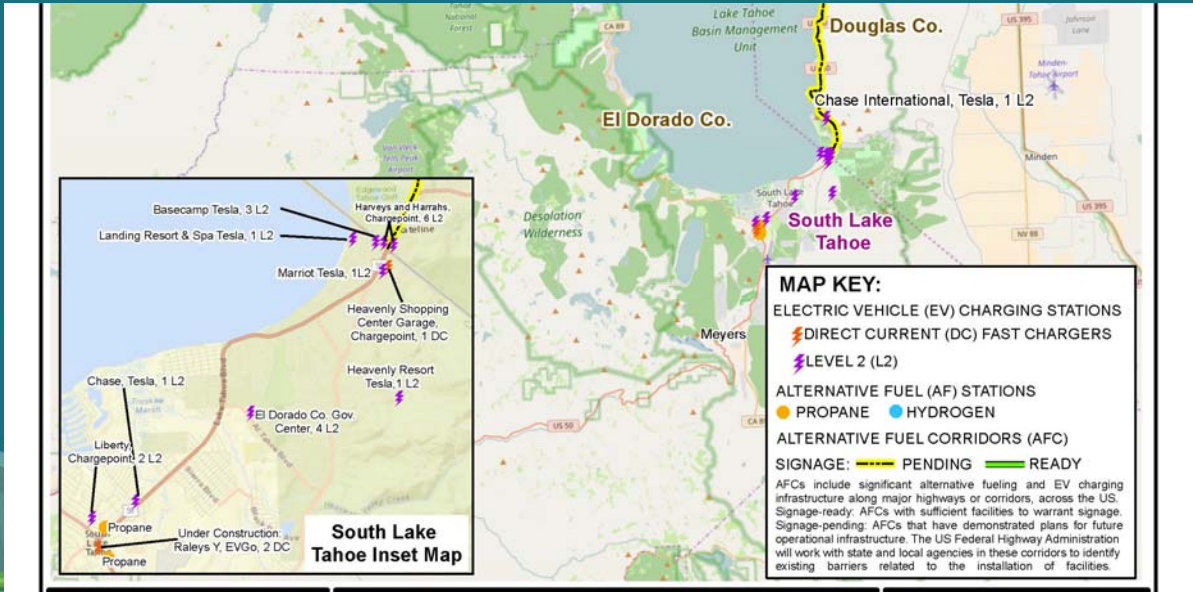

- ELECTRIC VEHICLE (EV) CHARGING STATIONS
- DIRECT CURRENT (DC) FAST CHARGERS
- LEVEL 2 (L2)
- ALTERNATIVE FUEL (AF) STATIONS
- PROPANE
- HYDROGEN
- ALTERNATIVE FUEL CORRIDORS (AFC)
- SIGNAGE: PENDING
- READY

AFCs include significant alternative fueling and EV charging infrastructure along major highways or corridors, across the US. Signage-ready: AFCs with sufficient facilities to warrant signage. Signage-pending: AFCs that have demonstrated plans for future operational infrastructure. The US Federal Highway Administration will work with state and local agencies in these corridors to identify existing barriers related to the installation of facilities.

Regional Chargers

Both I-80 and US 50 were selected by the Federal Highways Administration as signage-pending Alternative Fuels Corridors

Electric Vehicle Growth

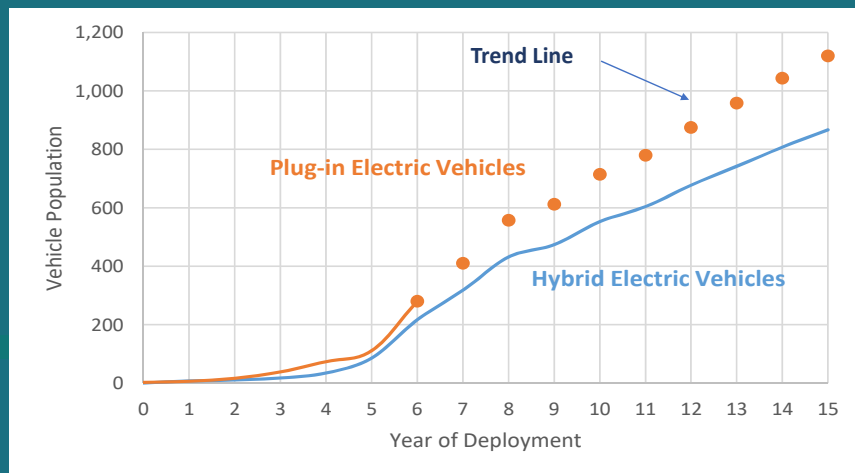

PEV adoption rate higher than hybrid adoption at time of technology deployment in the mid-2000s.

PEV Ownership, 2016:

- 115 PEVs registered by area residents
- 45% Tesla

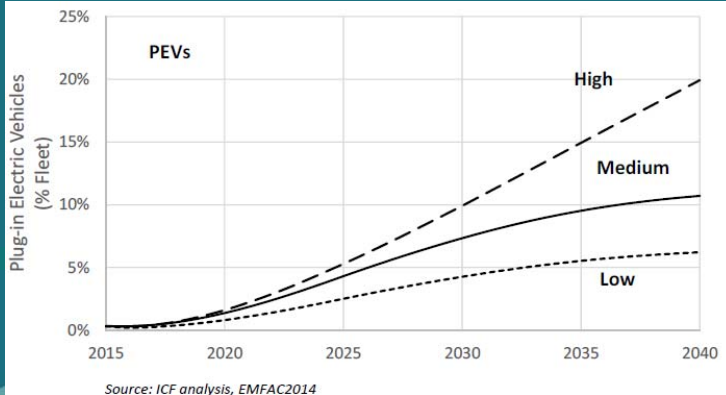

ICF analyzed vehicle registration data provided by IHS Automotive, March 2016.

PEV Growth Scenarios

Medium Scenario: 3-6% EV trips by 2025 & 6.5-13% by 2040

California 2025 goals:
15% of light duty sales must be Zero Emission Vehicles

TAHOE-TRUCKEE KEY FINDINGS

Vehicle Ownership Survey

Vehicle Ownership Survey, June-July 2016, 424 Respondents

SUMMARY

OPPORTUNITIES

- ★ Strong interest for EVs
- ⊕ Optimistic outlook
- 📍 Ideal commuting patterns for EVs

CHALLENGES

- ⊘ Top rated brands have limited EV offerings
- ❓ Not that familiar with incentives available
- ✓ Preferred vehicle attributes

WHAT WE HEARD

- 44% will consider buying an EV for their next car
- ↑ Majority of respondents think sales of EVs will continue to increase
- 56% of respondents drive less than 20 mi/day

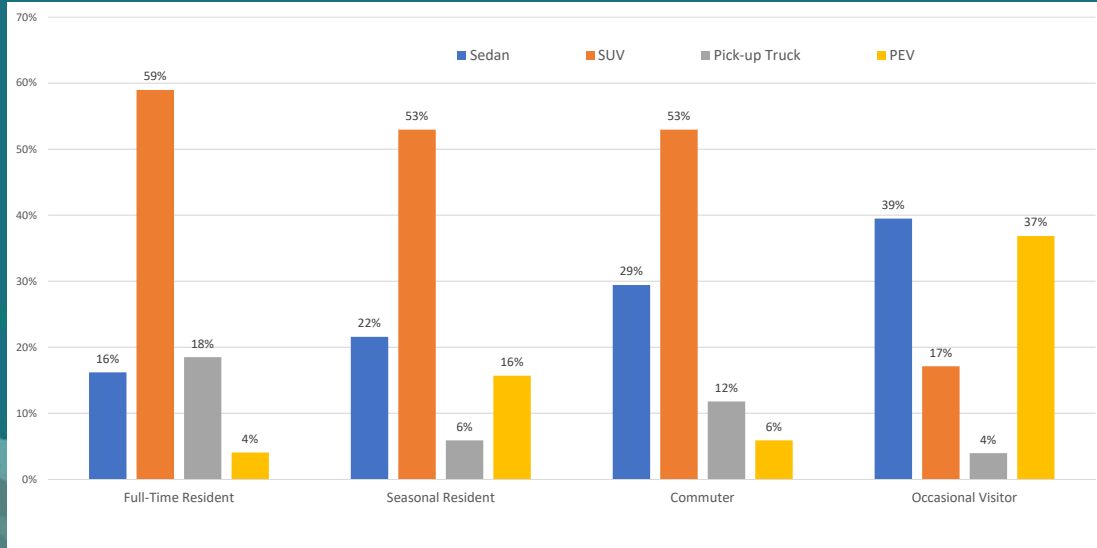

- 🏆 Top-rated brands are Toyota, Honda, Subaru
- ❓ Over 50% were not familiar with incentives
- ⊘ Limited all-wheel drive and limited cargo/trunk space for most EVs

TAKE-AWAYS

Consumer Awareness can help Foster Market Growth
EV Offerings are Expanding Rapidly

Current Vehicle Ownership Trends

Vehicle Option Cost Comparison

	Vehicle Make & Model	Electric Range	Estimated Cost (Base)	Other Costs
BEV	Tesla Model S, X, and 3 (2017)	200-270 miles	Model S - \$70,000 Model X - \$80,000 Model 3 - \$35,000	Home charger costs \$600 to \$3,000 (not including rebate)
BEV	Chevrolet Bolt (2017)	200 miles	Chevrolet Bolt, \$38,000	
BEV	Nissan Leaf, Kia Soul, Mercedes Benz B-Class, Fiat 500e	84-107 miles	2016 Nissan Leaf - \$29,860 2016 Kia Soul EV - \$31,950 2016 Mercedes-Benz B250e - \$42,375 2016 Fiat 500e - \$31,800	
BEV	BMW i3, Chevy Spark, VW eGolf, Ford Focus, Honda Fit, Mitsubishi iMiev	62-83 miles	2016 Chevy Spark - \$25,995 2016 Volkswagen e-Golf - \$29,815 2016 Mitsubishi i-MiEV - \$23,845	
PHEV	Chevy Volt	53 miles	2016 Chevrolet Volt - \$33,995	Fuel costs if go over electric range, home charger costs same as above
PHEV	Cadillac ELR, Audi A3e, Hyundai Sonata	27-37 miles	2016 Cadillac ELR - \$65,000 2016 Audi A3 Sportback e-tron - \$37,900 2016 Hyundai Sonata - \$35,435	
PHEV	Honda Accord, BMW X5, Porsche, Volvo	13-17 miles	2016 Porsche Panamera S - \$94,250 2016 Volvo XC90 T8 - \$69,095	
PHEV	Ford C-Max Energi, Fusion, Mercedes C350	20 miles	2015 Ford C-MAX Energi - \$32,645 2016 Ford Fusion Energi SE - \$34,775	
PHEV	Toyota Prius Plug-in Hybrid	11-14 miles	Toyota Prius PHEV- \$30,800	

This information is an estimate and meant to provide a snapshot of the growing diversity of PEV options. It might not provide the most up-to-date info. Robust Public Outreach & Education

Over half of the respondents did not know about incentives.

Online Resources & Email List Updates

The final Tahoe-Truckee Plug-in Electric Vehicle Readiness Plan has been released by the Tahoe Regional Planning Agency and Truckee County Public Utility District. The final plan is the result of a collaborative planning process to accelerate adoption of electric vehicles in the region.

Charging Infrastructure Siting Analysis

Where is the demand for electric vehicles?

Factors:

- Income
- Hybrid vehicle ownership rates
- Home ownership
- Dwelling type
- Regional travel patterns

Plan Implementation

On-Going Activities

- Monitor PEV and charging infrastructure deployment and local government PEV readiness
- Create cross-jurisdictional opportunities for sharing lessons learned
- Identify PEV related grant funding opportunities and coordinate charging infrastructure deployment, including corridor network of DC fast chargers and L1/L2 workplace charging

Short-Term (1-2 years)

Consumer Education & Outreach

- Develop PEV resources website

Incentives

- Develop a PEV purchasing incentive program
- Establish PEV electricity rates

Permitting & Inspection

- Streamline and expedite permitting process

Local Ordinances & Planning

- Develop charging station guidelines
- Adopt the Voluntary CalGreen codes

Training & Education

- Provide resources to employers and fleet managers

Utility Planning

- Create utility notification protocol

Regional Coordination

- Integrate PEV readiness into local planning efforts

TAHCE REGIONAL PLANNING AGENCY

Medium-Term (3-5 years)

Consumer Education & Outreach

- Implement utility consumer outreach program

Training & Education

- Provide technical assistance and training to fleet managers

Incentives

- Develop charging station rebate program

Utility Planning

- Evaluate impact of rate structures on PEV drivers
- Upgrade distribution infrastructure and evaluate needs

Permitting & Inspection

- Train permitting and inspection staff
- Reduce permitting fees for non-residential charging stations

Regional Coordination

- Create a utility notification protocol through permitting process
- Update EV infrastructure siting plan

Local Ordinances & Planning

- Develop PEV parking enforcement policies
- Adopt regulation for preferential parking for PEVs

TAHCE REGIONAL PLANNING AGENCY

Long-Term (6-10 years)

Local Ordinances & Planning

- Allow PEV parking to count towards minimum requirements

Utility Planning

- Evaluate smart grid opportunities
- Provide renewable

Regional Coordination

- Adopt plans that encourage the deployment of PEVs and charging infrastructure

Performance Metrics

Goal 1. Maximize the number of electric miles traveled

Ex: Avoided GHG and criteria air pollutant emissions

Goal 2. Make it easier and less expensive to install electric vehicle charging infrastructure

Ex: Time to permit and install infrastructure

Goal 3. Improve electric vehicle awareness

Ex: Public awareness of the benefits of electric vehicles

Implementation

California Energy Commission Grant (Round 2):

- Ombudsman
- Outreach and Education
- Site Specific Analysis
- Permit Streamlining

Tahoe-Truckee PEV Readiness Actions

Short-Term (1-2 years)

Consumer Education & Outreach

- Develop PEV resources website

Incentives

- Develop a PEV purchasing incentive program
- Establish PEV electricity rates

Permitting & Inspection

- Streamline and expedite permitting process

Local Ordinances & Planning

- Develop charging station guidelines
- Adopt the Voluntary CalGreen codes

Training & Education

- Provide resources to employers and fleet managers

Utility Planning

- Create utility notification protocol

Regional Coordination

- Integrate PEV readiness into local planning efforts

Implementation

Infrastructure Funding and Financing:

- Liberty Utilities
- Tahoe Fund
- California Energy Commission
- Private charging networks
- Other funding opportunities

Implementation
